FILE::LOAD: · Epson Stylus CX3800 and CX3810 driver for Windows 98/XP/2003/Vista · NOTE: This driver works fine with your Stylus running Windows XP/2003, but when connecting a scanner/copier to a Windows 98/2000 computer, it might be necessary to add the following "filter" registry settings to the "Add or Remove Windows Components" section of the "Computer Configuration" control panel: HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet\services\usbmon\Parameters Create a new registry value named usbmon.probe\_device and add the word "Enabled". Then, save the registry file, reboot the computer and scan again. This type of problem has occurred for other drivers I have installed. · NOTE: This is a new version of the "Stylus CX3810" driver. · NOTE: If you have downloaded the "Stylus CX3800" driver, you do not need the "Stylus CX3810" driver, you can go to the "Stylus CX3800" site and download the new CX3810 driver. If you wish to use the "Stylus CX3800" driver, this is the driver you need. · NOTE: When you download the "Stylus CX3800" driver, you may have to unzip the file and double-click on the "setup.exe" file to install. Installation may be done automatically or you may be asked if you want to choose "Custom" installation. · NOTE: Once you have downloaded the "Stylus CX3800" driver, you may have to unzip the file and double-click on the "setup.exe" file to install. Installation may be done automatically or you may be asked if you want to choose "Custom" installation. · NOTE: There will be a selection screen after installation. You will need to choose "Scanner" and select "No" for both the first and second screens. After you have selected "No" for both screens, you will be prompted to add some additional registry entries, click "Next". · NOTE: You will also need to add the registry entries listed in the HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet\services\usbmon\Parameters\Epson USB Application DLLs\Stylus CX 81e310abff
