The 2016 new, internationally leading Prototyping tool has become an indispensable, easy-to-use tool for creating interactive mockups. For designers, developers, product managers, and even the client, Mockplus is a one-stop prototyping tool that effortlessly creates interactive mockups. With more than 30 vector-based components, tens of flat icons, and 2500+ icons for your reusable applications, you can get great results quickly. Mockplus is a standalone tool, with its own framework and syntax. It's lightweight, simple, and portable, enabling you to create interactive prototyping tools of the highest quality. Mockplus is ideal for creating mobile applications, prototypes of websites, user interfaces, web applications, and more.

1. Create interactive prototypes in a few clicks Drag and drop your reusable elements and components to design a mobile, web, and desktop application or a product interface. Sketch out your prototype in seconds with the built-in high quality vector-based objects and objects from the repository.
2. Add comments, edit notes, and annotations Comments, notes, and annotations are indispensable to any creative team. It becomes easier for everyone to see the project's design process and communicate through annotations. You can also add material effects to help you create mockups that appear more real and convincing.
3. Fast collaboration and secure sharing You can share the project tree with other team members and clients. Your design changes and comments can be seen directly on the remote version of your prototype. The WYSIWYG interface allows you to add in-line comments on any object and export your project to other formats, such as PDF, SVG, and PNG.
4. Prototype any devices You can create mockups that are optimized for mobile, PC and web. Add a background image to simulate different screen sizes. Mockplus offers layer mode and a new slicing mode that gives designers more freedom and creativity when designing mockups.
5. Be Creative, Fast Mockplus is a powerful prototyping tool for mobile app, web, web application, and UI design. Simply drag and drop, customize and preview your mockup on any device. [www.mockplus.com](http://www.mockplus.com)
