Take on the role of Tarnished, a first-class summoner under the tutelage of Kyros, a master of rune magic, and quest for glory in the story of the Elden Ring. As you explore and battle large dungeons, you will collect valuable materials for your divine runes. Then, by using runes infused with souls that you have collected, you can summon more powerful creatures to assist you during the battle. You can summon a variety of monsters: warriors, archers, cavalry, mages, and others. While they are only passive allies, they have extensive attack power. Using them alongside your own powerful and unique skills can become a match for even the strongest opponents. The items you obtain in the World of Dungeons will support your journey in this story of the Elden Ring. There are over 1500 items that you can combine to form an adventure party. As you grow stronger, you can increase your power by using "Summoning Points" to summon more powerful monsters. You can also improve your skills by utilizing "Astro Stance", a skill that increases your attack power while performing a special stance. During your journey, the story of the Elden Ring unfolds as you gain more and more Summoning Points. You can also learn new skills by equipping "Intelligence Stones" that increase your intelligence.

Kolaten Chipper, the high-tech bird chipper that has netted a legacy of ignominious namesakes, has one last trick up its sleeve. It will look a lot like a pile of wet leaves. In a test at its Dutch plant, the Amsterdam-based company is putting one more effort into making its "green" chipper a piece of the eco-friendly urban landscape.

Advertisement The company has switched from gasoline to biogas, or natural gas, to power the chipper. It's a natural fit, as the chipper sits at the end of a process called gasification, which converts organic material — such as food scraps — into a biogas. All that remains is to pipe the gas to a boiler, where it can be made into electricity. "The more efficient you are, the more environmentally friendly you are," says Chris Ruhl, Kolaten Chipper's head of technical development. "
