In addition, the game introduces the improved Dribbling System which uses AI to analyse player movement, passing habits and shooting tendencies, and this information is used to make AI-controlled teammates smarter and more unpredictable in the game. The Dribbling System is designed to enable players to do more with the ball in different match scenarios. For example, a player holding the ball may shoot on goal or perform a short pass with his right foot. The game also introduces a new contextual menu system which is used to control all of the game's interactive menus in a variety of game modes, including FUT, Pro Clubs and FUT Champions. The game will be available to play on Xbox One, PS4 and PC on September 27th for \$59.99USD/€59.99/£49.99 in North America. Players can pre-order the game on www.FIFA.com now to receive additional content including Gold, VIP tickets, and additional licenses. FIFA (acronym for "For example: If you are playing as "Team X" vs "Team Y", and Team Y gets a Penalty, "Hold the Button/Press the Right Stick to Throw the ball in for a shot." or "If you are playing as a Defender, if you move the D-Pad Left, right, up, or down, the player will run/dodge accordingly.") is an electronic sports video game series created by Electronic Arts available for the Sony PlayStation, Sega Dreamcast, GameCube, Xbox, Sony PlayStation 2, Nintendo GameCube, Xbox and Microsoft Windows. It is the first video game in history to sell over 100 million units worldwide. Although it is a sport video game, it is not meant to be realistic, but to instead maintain the video game-like feel of a sport, thus resulting in gameplay that is the closest yet to real life sports. The games are edited to follow real-life events, with all major football tournaments from the past 20 years included in the series (not including FIFA United Classics), such as the 1998 and 2002 FIFA World Cups and the UEFA Champions League. Other sports that are featured in the game include Association football, Baseball, Basketball, Cricket, Field hockey, American football, Handball, Association football, Roller hockey, Volleyball, and Water skiing. History The franchise first appeared in the video game FA Football Manager in 1989. It has been published by EA Canada since then. The game was also one of the first sports games to allow players to create their own teams. Although many of the teams (like Seattle Sounders and Anaheim ThunderCats) are fictional, most real-life teams (like New York Cosmos and New England Revolution) appear. Gameplay My Player My Player is the leading mode for user created content (UCC) in the series. It is separated in 2 different views, the Create-a-Player and the Create-a-Club. In Create-a-Player, players can customize the appearance of their player, as well as train and play on the field with the already created player. They can also create custom formations and tactics. In Create-a-Club, they can create, join, or play in their own team. It allows them to create clubs with real-life players and to compete against other teams on their own. Gameplay features The
