If you have a door that does not have a deadbolt, then you have a hole in your security perimeter that could be a point of attack. The deadbolts are deadbolts because they lock, however, they will not stop attacks. So, depending on your knowledge and training, there are options to plug this hole in your security perimeter. Switches A deadbolt can be activated by inserting a key or combination in the lock. While a deadbolt does stop the door from opening, it is not the same as a door lock. A switch does not require a key or combination. When the switch is activated, it activates the door lock. Many of our customers like the convenience of a switch for their home/business doors. However, if you want to be able to lock your door from the outside, a deadbolt is the best choice. If you would like to read our reviews of the Emtek switches here, here and here. Also, if you are interested in high-security deadbolts, these switches are one of the best solutions for very expensive deadbolts. Door Locks The first thing you will notice when you look at a door is the deadbolt. A deadbolt can also be added to the back of a door. If you are interested in deadbolts, you may want to read our reviews of the Emtek deadbolts. If you are interested in door locks, you may want to read our reviews of the Emtek door locks. If you do not like the look of our Emtek door locks, you can
